

# 1 Executive Summary

IT6 created a new collection of training modules. According to the objectives relevant to this deliverable, 14 training modules have been collected and made available in the Training area of the ETSF web site<sup>1</sup>. The creation of this site using a Content Management System has provided new potential for new and more web-oriented e-learning modules.

The training modules have been collected from two ETSF schools: one on electronic excitations, the other on atomic-scale software development. Other schools, training activities and practical hands-on will constitute the basic of future additional material.

IT6 has worked, in order to reach the objectives of this deliverable, in collaboration with the organizers of the different ETSF schools, as well as with the ETSF website developers team.
